(54) Title: COOLING SYSTEM FOR A MOBILE TERMINAL FOR WIRELESS COMMUNICATION

(57) Abstract: The present invention relates to a cooling system for a mobile terminal for wireless communication comprising a rotating fan (1) for reducing the heat generated by the mobile terminal and at least one weight (3) for causing an unbalance of the rotation of the fan (1) in order to cause vibration of the fan, whereby said weight is activated when the rotational speed of the fan (1) exceeds a predefined level.
